

## *How to get the most out of your solar assets!*

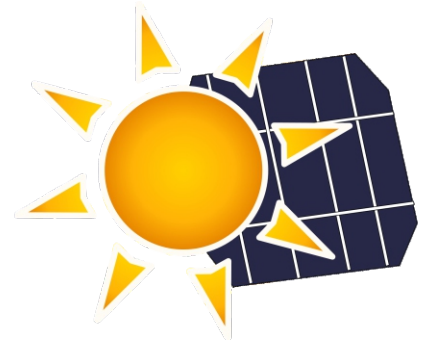

With the warm weather quickly approaching and the fresh smell of newly blooming flowers coming in, the Cachelan team wants to make sure you will be enjoying your summer vacation.

With the SolarVu energy portal, one thing you do not need to be concerned about is how your solar generation system is performing so that you can relax this summer. Receive daily email output reports to see earnings each day. View live weather reports and daily photos updated 24/7 for security and insurance so that you can sit back and relax this summer.

Now with a lower capital cost option and ways to get SolarVu from pushing data - SolarVu has never been cheaper!

### **Additional Features:**

- SmartStrings - be alerted of faulty panels
- PowerWatch - Identify inverter discrepancies
- Inverter Status - compare the output of each inverter
- New features coming soon!

We value your feedback! We would love to hear how you are optimizing your solar assets this summer with your SolarVu Lite. New to Cachelan? Contact us to learn more on how we can reduce your costs.
